

I am totally against Broadband Over Power Lines. There are other ways to handle broadband and it is my feeling that it would not be controlled properly. This would cause many problems in rural areas as the shortwave radio frequencies and radio frequencies are relied on heavily for our normal day to day emergency communications. PLEASE DO NOT ALLOW THIS TO HAPPEN. It can not be controlled. Investigate all the negative possibilities very carefully and I believe that you will find that they outweigh the positive capabilities of this service. Do not due this just to satisfy large powerful companies with large dollars. Do what is best for our nation as a whole, do not allow this to happen.
