

I am opposed to the Internet over power lines as the local tests conducted by Progress Energy caused a number of interference calls to our radio station, making reception unusable. In times of emergency, (tornados,extreme weather,other emergencies) The public depends on radio for information on what to do as well as the status of emergency personel. I have seen the dependence of listeners on radio and feel this would be devastating. Before allowing this to continue, please look at what you would be doing to the communities that depend on radio for emergencies.
