

Since it is very apparent that the only interest the FCC Commisioners have is the "BIG MONEY" to be reaped from BPL! It would be best to place all those dollars in an escrow account so that you can re-imburse the 600,000+ Amateur Radio Operators for the MANY Thousands of dollars they have invested into radio equipment that BPL will effectively render useless!!!! Useless for general Ham Radio Operation, useless for R.A.C.E.S/A.R.E.S. and SkyWarn!!!! The money output for this "Useless" radio equipment would excede the BPL income.

PULL THE BLINDERS OFF AND SEE "THE REST OF THE STORY"!!!!

But, of course, you are only interested in "MONEY", not the destruction of your PRIMARY back-up emergency communications!

There have already been many promises made, and none kept, in reference to BPL and Amateur Radio!!!! This makes your word worthless to me and many others!

I have NO FAITH in the FCC forcing the companies involved with BPL to keep their act clean when the FCC can't even enforce their present rules regarding interference from companies like EXCEL, etc!

And I thought that it was only Congress that cowed down to the special interest groups with lots of money!

Nothing personal, but get your heads back into the sunlight!

Remember: "NO FAITH" IN THE F.C.C.
