

Please do not permit BPL transmissions. The ARRL tests have shown that the interference in the test cases prevented use of the HF spectrum by other legitimate users unless they had exceptionally strong signals. Please do not allow this pollution of our airwaves. Even common sense knows that promises by "big business" to some day take the necessary measures to fix the RF pollution are bogus because it would be economically prohibitive. In fact, in all the test cases, they have never succeeded in doing so yet! There are many other forms of internet provision. Please do not allow BPL and ruin the HF spectrum for ALL other users! Thanks, Greg Knapp

inherent RF interference
