Dear Ms. Atkinson:

Recently a constituent of mine, Patrick Shea, contacted my office with concerns about Broadband Phone Lines. After reviewing the request, I have forwarded the letter to you so that the matter can be more directly handled.

Thank you for your time and effort. Please send any response directly to the constituent.

Sincerely,

Shelley Moore Capito, M.C.

Subject: WriteRep Responses

I would like to express my concerns about the purposed Broadband over Powerline technology. I have witnessed the interference cause by this technology. I have also experienced the impossible task of trying to contact the Power Company to correct current problems causing interference. They do not have personnel of a technical nature able or willing to work on interference issues.

Other than the issues of interference of BPL, I question the intent to provide broadband service to the rural customers. With the availability of broadband to the rural customer being the large selling point of this technology. I would hope that completing the existing cable and DSL infrastructure would have better economic advantages.

I know this is a political/big business/money issue but this technology will have great interference effects on several radio services including police, fire, and ems agencies.

Please do not allow this technology continue without correcting all the interference issues.

Thank you for your support.
