

Hi

I love listening to SW radio and news, music and important info from around our country and the world. Many of us are sick of the violence and junk on TV and don't want to watch it. So, we turn to radio, the last bastion. Many of us are also sick of big money and corporations dictating how we live our lives. What about the hard working good citizens that live for just a simple pleasure in life?

To be able to have fun with their hobby and listen to simple SW radio. BPL will ruin it. Test runs made by many show how it will just ruin this hobby and *way of life* for everyone. I though we live in democracy where the little guy is protected and his rights are looked after. How much lobbying money has these companies interested in BPL paid out already? Is this what the world is reduced too? Pay me enough and you can walk over anyone you want? Why does everything have to be about money? When is progress just too much?

Please, tell these corps to look for blood elsewhere. Don't ruin my way of life and millions of others. It's just not right. You are the people who decide what will happen. Please, speak up for us. Corps are loose to do what they want now and the public needs someone to protect them and their interests. Radio, simple SW radio. Who ever thought someone would come along with something to kill it off. Great world we live.
