

Before the  
Federal Communications Commission  
Washington, DC 20554

In the matter of:

Carrier Current Systems Including Broadband over Power Line Systems		ET Docket No. 03-104
Amendment of Part 15 regarding new requirements and measurement guidelines for Access Broadband over Power Line Systems.		ET Docket No. 04-37

This is in response to the above entitled matter.

In tandem with the efforts of the HAM radio community, we oppose the proposed changes to FCC part 15; ET Docket No. 04-37. The benefit of power line communications to satisfy broad band communication demands in sparsely populated or economically underserved areas is attainable through a substantially more cost effective method that adheres to unintentional radiation standards and will not interfere with other RF communication systems.

Respectfully Submitted:

Scott Thompson, CEO  
RealTronics Corporation
