

Only two stations in the Corpus Christi area are broadcasting digitally, CBS and PBS. ABC and NBC continue to show that they are trying to change their permit frequency. In addition ABC is not allowing DirectTV to rebroadcast their station. By not broadcasting digitally these companies are costing me money to get a better quality picture than what I can get via analog. Stations that are not following the original FCC time schedule for broadcasting digital need to be fined! Why should I be the one to be paying a premium versus other cities of this size.
