

BPL is a bad idea for those of us who live out in the country. Broadcast signals for Television, AM/FM radio, and shortwave radio are already polluted by lots of RF interference. Rather than enhancing our services, BPL will only make it much more difficult for those of us who listen to shortwave broadcasts from around the world to tune in those stations. Please do not allow BPL to become a reality. Stop it now before we all suffer with diminished services.
