

Its only apparent that there is no faith in a corrupted institution called the FCC, I was a republican but I think I am changing my vote to democrat this election based solely on Chairman Powells muscling in of BPL and changing the part 15 rules allowing its interference. Despite all the evidence presented by the ARRL and NTSC this old untouched until recent technology is pushed upon HF radio spectrum by Enron type Execs to spread their already fat pocket books, obviously filling the pocket books of Mr. Powell. The BPL has been allowed to continue testing illegally as the ARRL has been filing complaints continuously to the FCC with no response. Latest Mr. Powell has basically forwarned the amateur radio community to step back or feel the consequences. This is election time and I am saying its time to vote out chairman Powell. He is flagging in BPL over the sanctity of our Homeland Security and Public Safety. The election is coming in November .. you choose.
